ABSTRACT OF THE DISCLOSURE

•	ADDITATED OF THE DISCESSORE
2	A telescoping topstay for a rigger that includes a length adjustable tubular member
3	with a plug connector attached at its distal end which attaches by a bolt to the top end of the
4	oarlock pin and a proximal end that attaches to a base bracket attached to the sides of the boat
5	hull. Attached to distal end of the tubular member is a diagonally aligned plug connector.
6	The plug connector is able to selectively rotate and lock in a desired position on the distal
7	end. Attached to the proximal end of the tubular member is a transversely aligned pivot
8	connector that connects to the base bracket. The pivot connector is able to axially rotate over
9	the proximal end of the tubular member. The pivot connector is also able to rotate over the
0	base bracket.
